MUNICIPAL FACILITIES REVOLVING LOAN FUND

INTRODUCTION

This document is the State of Louisiana's Intended Use Plan (IUP), prepared by the Financial Services Division (the "Division") of the Louisiana Department of Environmental Quality (LDEQ). It is for all funds available to Louisiana's Clean Water State Revolving Loan Fund (CWSRF) during Fiscal Year (FY) 2009. LDEQ is continuing a long range plan to protect the future health of the CWSRF while providing financial assistance for wastewater collection and treatment infrastructure and other eligible environmental improvements to Louisiana communities.

I. PROJECTS AND AVAILABLE ASSISTANCE

The IUP is based on FY09 sources of funds of \$212,729,018, and uses of funds of \$85,879,595 (See FY09 Chart 2, Sources and Uses). This IUP contains a list of projects the State anticipates to fund and information on how the State plans to use the funds the State plans to request from the Environmental Protection Agency (EPA) during FY 2009, The funds the State will provide to match the new EPA funds, and the funds the State receives from the repayment to loans previously made from the CWSRF program. Available revenues consist of the cash balance forwarded from the previous year, federal grants, and state matching funds, interest earnings on loans and investments, and principal repayments. It is our plan to use the FY09 revenues to provide below market rate loans on eligible projects, to protect human health, to improve the water quality and economic viability of Louisiana's rivers, lakes and groundwater, to assist in hurricane recovery, and to administer the CWSRF program. As hurricane loans become active it may be necessary to leverage the program to meet demand. We estimate that over 58 million (See FY 09 Chart 2, Reserve Balance less Total Anticipated FY09 Loan Closings) will be available to provide assistance during FY 2009.

The CWSRF has provided financial assistance totaling \$419,001,480 as of this date and has signed binding commitments for \$101,220,000 (See FY09 Chart 1, Loans Closed/Commitments). We are currently in negotiations with St. Tammany Parish to secure a binding commitment in the amount of \$150,000,000 for a five year consolidation project. In FY09, it is anticipated that the CWSRF will provide funds for 5 projects totaling approximately \$68,454,500. See the anticipated FY09 Loan Closings chart below. These municipalities are on the current CWSRF Priority List, and have submitted or are in the process of preparing a Facility Plan required for participation in the program. These loans will be funded with grant funds, and state match.

FY09 LOAN CLOSINGS	
Bossier Parish Sewer District	\$17,450,000
Franklin	3,338,500
Oakdale	2,146,000
City of Monroe	14,000,000
St. Tammany East & West Project (20% of total amount requested)	<u>31,520,000</u>
TOTAL	<u>\$68,454,500</u>

MUNICIPAL FACILITIES REVOLVING LOAN FUND_____

II. CWSRF GOAL

Louisiana is committed to support the three major objectives found in Title VI, and has established its long term goals and short term goals accordingly. The objectives and goals are summarized below.

A. Objectives:

1. To step up wastewater treatment facility construction in order to meet the enforceable requirement of the Clean Water Act.
2. To stress nonpoint source pollution control and the protection of estuaries.
3. To facilitate the establishment of permanent institutions in each State that would provide continuing sources of financing needed to maintain water quality.

B. Long Term Goals:

The CWSRF continues to maintain long-term goals to ensure it assists the State in meeting water quality goals and ensure the long-range integrity of the fund.

1. To achieve statewide compliance with Federal and State water quality standards by providing financial assistance to municipalities and other qualified recipients.
2. To promote expanded eligibility under Title VI of the Clean Water Act that allows financial assistance for additional project categories. These additional project categories include non-point sources, reconstruction of facilities, facilities needed to accommodate population growth, estuary, and groundwater-related needs.
3. To maintain the fiscal integrity of the Fund and to assure its continuous enhancements in perpetuity through maintaining net assets equal to federal capitalization grants and state matching funds and the use of a cash flow modeling plan.

C. Short Term Goals:

LDEQ will pursue the following short-term goals in an effort to continually improve the CWSRF program.

1. Communicate the availability of the CWSRF Program by Division personnel at conferences or conventions during the year. We plan on presenting program information at two (2) conferences and conventions during the year. The target audience of these conferences or conventions will be local municipalities and local police juries' with publically owned waste water treatment facilities.
2. Municipal Facilities Engineering Section plans on preparing and mailing information about DEQ's CWSRF program to all permitted publically owned treatment facilities. Included with this letter will be advertising materials such as magnets, rulers, note pads, etc.

MUNICIPAL FACILITIES REVOLVING LOAN FUND

3. Municipal Facilities Engineering Section plans on meeting with at least 8 potential new loans recipients to discuss the benefits of the CWSRF to their communities in terms of financial savings and compliance with federal and state water quality standards.
4. Participate in the newly formed Louisiana Waste Water Joint Funding Committee (LWWJFC) meetings. The LWWJFC will meet periodically in the year to review intent to file applications for waste water projects in Louisiana. These projects will include those applying for both grant and loan dollars. LDEQ will be able to respond to all communities how we can assist with their projects.
5. The Division anticipates applying for the FY 2008 Capitalization Grant in SFY 2009.

III. INFORMATION ON CWSRF ACTIVITIES TO BE SUPPORTED

A. Communities Served and Financial Assistance Provided

LDEQ will pursue loans, refinancing of debt, and cooperative endeavors to assist in meeting the goals of the CWSRF.

1. LDEQ proposes to fund a feasibility study at Southern University in Baton Rouge to be completed by March 14, 2009. The study is to determine whether it is feasible for the university to construct a multi-train wastewater treatment facility that will treat the wastewater generated by the university, and also serve as a platform for teaching students about wastewater treatment technology and conducting research in new wastewater processes. The total cost of the project is \$236,000, of which \$199,000 will be paid from the non-program income portion of the Administrative Fee Fund and \$37,000 will be provided by Southern University.
2. LDEQ is funding a contract with Providence Engineering to perform wetland assimilation feasibility assessments that may result in future wetland assimilation permits for municipalities. The municipalities chosen for the study will be under the direction of the Water Permits Division, Municipal and General Permits Section. LDEQ's administration fees are being used to fund this project.

B. CWSRF Loan Rate

1. The present permanent CWSRF finance charge on all CWSRF loans is 2.95% and is stated in loan documents as 2.45% interest plus a 0.50% administrative fee charged only on loan monies drawn. The present CWSRF rate was set by the Secretary of LDEQ on October 11, 2006.
2. A variable rate based on the Baa 20-year bond rate listed in the "Bond Buyer Index" one week prior to loan closing was introduced during FY05. The .50% administrative fee is added to this rate to determine the total rate charged. The rate is adjusted annually in accordance with the rates forecast by the "Index" at the closing date. This rate allows a lower rate during the early construction years and has been utilized on all loans closed beginning with FY05 until October 11, 2006 when the rate of 2.95% was implemented.

MUNICIPAL FACILITIES REVOLVING LOAN FUND

3. A reduced rate of as low as zero, with a half percent charged to cover administrative cost, is being considered for certain communities impacted by the hurricanes and will be offered on a case by case basis and when approved by the Secretary.
4. The financial staff reviews the prevailing market rates found in the "Bond Buyer Index" and makes recommendations to the Secretary for changes. Actual changes are made when the Secretary deems them to be appropriate.

C. Administrative Costs of the CWSRF

LDEQ intends to use an amount equal to 4% of federal grant funds for administrative support. Additional monies for administrative costs of the CWSRF program will also be generated from LDEQ's 0.50% administrative fees charged on all loans or supplied by other state funds if needed. The State's Administrative Fees Fund is held outside the SRF Fund and as of May 31, 2008 had a balance of \$13,461,594. LDEQ estimates that administration expenses in FY 2009 will total \$661,196(See Chart 4).

D. Enforcement Orders

The CWSRF currently works closely with State and Federal enforcement officials to implement long-term goals and help communities comply with Federal and State water quality standards.

E. Cash Management

The Louisiana Department of the Treasury manages the investment of the CWSRF cash in the same manner as cash and reserves for other agencies and programs. Investments, by State law, are limited to government securities, collateralized bank certificates of deposit and like instruments. No changes to investment vehicles are presently contemplated.

IV. ASSURANCES AND SPECIFIC PROPOSALS

The Louisiana Department of Environmental Quality provides the necessary assurances and certifications as part of the Operating Agreement between the State of Louisiana and the U.S. EPA. This includes the requirements of the following sections of the law:

A. State Matching Funds 602(b)(2)

The State of Louisiana agrees to provide match monies in an amount equal to 20 percent of each grant payment. The State of Louisiana will fund the required State Match by using State General Fund appropriations, Capital Outlay appropriations, tobacco settlement funds and bond proceeds. The State will deposit sufficient cash match into the CWSRF to meet its proportionate share requirement prior to drawing federal funds in accordance with 40 CFR 35.3135(b)(1).

B. Binding Commitments 602(b)(3)

A binding commitment is defined as the execution of contract called the Bond Purchase Agreement between the borrower and LDEQ. The Bond Purchase Agreement sets out the terms of the bond that will be issued by the borrower and purchased by LDEQ. The

MUNICIPAL FACILITIES REVOLVING LOAN FUND_____

binding commitment date is the date when both parties have signed that contract. The bond closing will take place within six months of the execution of the Bond Purchase Agreement.

The State of Louisiana will enter into binding commitments for 120% of each quarterly payment within 1 year of receipt of that payment.

C. Expeditious and Timely Expenditures 602(b)(4)

The State of Louisiana will expend all funds in the CWSRF in a timely and expeditious manner as required by this section and acknowledged in our Operating Agreement.

D. First Use for Enforceable Requirements 602(b)(5)

The State of Louisiana confirms that any publicly owned treatment works previously identified as part of the National Municipal Policy (NMP) universe are either in compliance, on an enforcement schedule, have an enforcement action filed, or have a funding commitment from a prior year.

E. Compliance with Equivalency Requirements 602(b)(6)

The State of Louisiana agrees to meet the specific statutory requirements (Title II) for publicly owned wastewater treatment projects constructed in whole or in part before FFY1995. Projects funded after FFY 1995 will meet applicable (non-Title II) equivalency requirements.

F. Environmental Reviews Requirements 40 CFR 35.3140

The State of Louisiana will conduct environmental reviews as specified in the Project Review Procedures of the Operating Agreement and 40 CFR 35.3140.

V. CRITERIA AND METHOD FOR DISTRIBUTION OF FUNDS

The approach used to develop Louisiana's proposed distribution of its SFY 2009 CWSRF funds is as follows:

A. Type of Financial Assistance - State Revolving Fund (SRF)

The staff of the Financial Services Division will perform fiscal analysis to determine the amount of funding to be available. Because of the sufficiency of loan repayments and municipal bond market, financial or refinancing is available for both large and small communities. The State's Project Priority List is utilized to obtain SRF funding. The Project Priority System will be revised to accommodate demand and community needs in excess of the financial resources readily available to the program. The Project Priority List is subject to Federal approval. Future IUPs will incorporate any revisions to the Project Priority List with detailed explanations.

B. Sources of Funds

Sources of Funds Available for Loans and Administration – FY09 Chart 2 identifies Louisiana's total funding sources for FY2009 \$212,729,018 in resources will be available

MUNICIPAL FACILITIES REVOLVING LOAN FUND

to the State of Louisiana's CWSRF in FY2009 including federal capitalization grants, state matching funds, interest earnings and loan repayments.

The EPA Administrator, or his duly authorized representative, and the State of Louisiana shall jointly establish a schedule of payment under which the EPA Administrator, or his duly authorized representative, will pay to the State of Louisiana the amount of each grant to be made to the State under Title VI of the Act. This schedule shall be based on the State's IUP under Section 606(c) of the Act, except that:

- Such payments shall be made in quarterly installments, and
- Such payments shall be made as expeditiously as possible.

These payments shall be made by the EPA Administrator, or his duly authorized representative, to the State of Louisiana based upon disbursement schedules for all awarded Capitalization Grants.

C. Allocation of Funds among Projects

1. Priority List and System

All projects scheduled for funding with Louisiana's CWSRF have been reviewed for consistency with appropriate plans developed and approved under Section 205(j), 208, 303(e), 219 and 320 of the of the Clear Water Act, as amended. Evidence of this review and finding of consistency is documented in each CWSRF project file.

The status of the National Municipal Policy (NMP) projects in this Intended Use Plan will not be affected by the work contemplated. All of the projects listed on the NMP List have been previously funded.

The State's Project Priority List consists of a listing of all projects that have, or are expected to qualify for, and participate in the program (See the FY09 Priority List). These projects are ranked by staff in the Municipal Facilities Engineering Section, given a priority rating, and then listed in alphabetical order on the current Priority List. Loans are approved from this list on a readiness to proceed basis. Should total actual project needs exceed CWSRF funds available, projects to be funded will be prioritized according to the Priority System. When needed, and with EPA approval, procedures will be established by the Division to sell bonds to expand the program to meet demand, or develop other procedures that are in the best interest of the Louisiana CWSRF program.

2. Disbursement Schedule

Louisiana's disbursement schedule is based on estimated project construction dates and projected EPA/ACH payment draw downs from current grants, anticipated allotments and cash balances available for these projects. Estimated quarterly draws are shown in FY09 Chart 4 Estimated Uses of Funds.

Five (5) projects are identified as fundable during the FY09 (Bossier Parish SD#1, Franklin, Oakdale, City of Monroe # 5, and St. Tammany Parish East & West).

MUNICIPAL FACILITIES REVOLVING LOAN FUND_____

3. Bypass procedures

If a project's readiness to proceed status changes after it was placed on the Fundable List, the Municipal Facilities Engineering Section reserves the right to put the project on hold. If a project is not ready to proceed, the Municipal Facilities Engineering Section will substitute another project on the Priority List.

VI. PUBLIC REVIEW AND COMMENT

A copy of the IUP was made available for public review and comment between August 1 and August 7th, 2008 and written comments were accepted through close of business, September 2, 2008. (See copy of public notice below.) Any comments received will be duly considered and will be provided to EPA.

PUBLIC NOTICE

Notice is hereby given that the Financial Services Division of the Louisiana Department of Environmental Quality (LDEQ) is applying for approval of the Municipal Facilities Revolving Loan Fund Program FY09 Intended Use Plan (IUP) from the U.S. Environmental Protection Agency. Copies of the IUP are available at <http://www.deq.louisiana.gov/portal/tabid/2153/Default.aspx> or by contacting the department at deqfinancial@la.gov.

Interested parties may review the IUP and submit written comments to LDEQ Financial Services Division, Attn: IUP Comments, PO Box 4303, Baton Rouge, LA 70821-4303. Written comments must be received not later than 3:00 p.m. on September 2, 2008 after which time and date they will not be accepted.

VII. RECORDS

The State of Louisiana will receive and review all project documents from assistance applicants. These documents, together with the State's review memos and checklists, will be filed in the official electronic project files maintained by the State. The project files and other CWSRF records located in the State offices shall be made available in accordance with public record laws and for EPA on-site visits scheduled as part of the annual review or audit of the CWSRF.

The State of Louisiana will retain the official project files and other CWSRF files in accordance with 40 CFR Part 31 and will otherwise arrange for the storage of files in accordance with Louisiana State Law and applicable Department Policy and Procedures.

VIII. INTENDED USE PLAN AMENDMENT PROCEDURES

Revisions to this Intended Use Plan (IUP) that are determined material will require public notice and EPA notification and approval. Revisions to this IUP that are determined not to be material shall be made by the Division with notification to EPA or through EPA's required annual reporting.

FY09 Sources and Uses of Funds

ANALYSIS OF LOAN ASSISTANCE AVAILABLE IN FY 2009

as of 5/31/2008

SOURCES OF FUNDS

Cash Available (per Audited Financial Statements as of 6/30/07)	\$	129,348,832	
Additional Cash Provided in SFY 2008 (as of 5/31/2008)			
Principal Repayments		8,366,571	
Loan Interest		6,442,711	
Undrawn Grants (per Audited Financial Statements as of 6/30/07)		29,579,869	
Pending 08 Allotment		11,765,655	
Required State Match (20%)		8,269,105	
Principal Repayments to be Received in FY 09		11,239,942	
Loan Interest to be Received in FY 09		7,183,551	
Interest Earnings on Investments as of 5/31/08		532,782	
TOTAL SOURCES			\$ 212,729,018

USES OF FUNDS

Current Loans & Administrative Expenses

Estimated Loan Disbursements Grant (see chart 4)	\$	12,018,934	
Estimated Loan Disbursements State Match (see chart 4)		2,404,366	
Estimated Loan Disbursements Cash on Hand (see chart 4)		1,462,566	
Estimated Administrative Expenses Grant (see chart 4)		550,972	
Estimated Administrative Expenses State Match (see chart 4)		110,224	
TOTAL CURRENT USES			16,547,062
Estimated undrawn balance of loans 5/30/2008	\$	69,332,533	
Total Undrawn Loans			69,332,533
TOTAL USES			\$ 85,879,595
RESERVE BALANCE	(sources-uses)		\$ 126,849,423

ANTICIPATED FY2009 LOAN CLOSINGS

Bossier Parish Sewer District	\$	17,450,000.00
Franklin		3,338,500.00
City of Monroe #5		14,000,000.00
Oakdale		2,146,000.00
St. Tammany East & West (Phase I, 20% of total amount requested)		31,520,000.00
TOTAL ANTICIPATED LOAN CLOSINGS	\$	68,454,500.00

Municipal Facilities Revolving Loan Fund Priority System

A. Introduction

1. On October 18, 1972, the Federal Water Pollution Control Act Amendments became Public Law 92-500. PL 92-500 was amended by PL 95-217, the Clean Water Act of 1977, PL 97-117, the Municipal Wastewater Treatment Construction Grant amendments of 1981, and most recently by PL 100-4, the Water Quality Act of 1987.

2. The primary aim of the Act is to “restore and maintain the chemical, physical, and biological integrity of the Nation's water.” The Act emphasizes the national goal that, wherever possible, water quality is to be suitable for recreational contact and for protection and propagation of fish and wildlife. In addition, the Act emphasized the special need for controlling or eliminating discharges of toxic pollutants, and that the goals of the Act be met through the control of both point and nonpoint sources of pollution. A permit program has been established and geared to restricting pollutant discharges from point sources—that is, from factories, municipalities, and large agricultural operations where pollutants enter the nation's water through an outfall pipe, sewer, or other conduit. The permit program has been expanded to include pollutants entering the Nation's water through non-point sources - that is, stormwater runoff from municipalities, factories, and agricultural operations.

3. The Water Quality Act of 1987 added Title VI to the Clean Water Act, which provides for a program of low interest loans. Section 603(c) of the Act states that “The amounts of funds available to each State water pollution control revolving fund shall be used only for providing financial assistance (1) to any municipality, intermunicipal, interstate, or state agency for construction of publicly owned treatment works (as defined in section 212 of this Act), (2) for the implementation of a management program established under section 319 of this Act, and (3) for development and implementation of a conservation and management plan under section 320 of this Act.”

4. Section 603(g) of the Act states that: “The State may provide financial assistance from its water pollution control revolving fund only with respect to a project for construction of a treatment works described in subsection (c)(1) if such project is on the State's priority list under section 216 of this Act. Such assistance may be provided regardless of the rank of such project on such list.”

5. Section 603(c) of the Act states that: “After providing for public comment and review, each State shall

annually prepare a plan identifying the intended uses of the amounts available to its water pollution control revolving fund.”

6. In implementing the requirements of the Act, the Louisiana Department of Environmental Quality, Office of Water Resources, has derived the State of Louisiana Municipal Facilities Revolving Loan Fund Priority System.

7. This system provides an orderly approach to preparing a priority list of publicly owned treatment works projects that meet the definition of section 212 of the Act and provides for the selection of these and other eligible projects to be included on the Intended Use Plan for each year

B. List of Stream Subsegments and Subsegment Priority Numbers

1. Most effective use of water quality management assets in achieving state and national goals requires that management emphasis be directed at the most important problem areas first. The priority of management effort is intended to give more consideration to those areas where the most significant problems occur.

2. The state of Louisiana is divided into 12 water quality management basins which exhibit distinct hydrologic characteristics. Each designated basin is divided into stream segments and subsegments which exhibit common reactions to stresses, i.e., pollutants. The stream segmentation for Louisiana is contained in the state's areawide water quality management plans submitted under Section 208 of the Act.

3. In order to provide the basis for directing the management effort for water quality, each stream subsegment is ranked according to its designated uses and the degree to which those designated uses are supported. The values from each of the category classifications, from Table B-1, are multiplied together to produce the stream subsegment priority number.

4. A list of the stream subsegments and their subsegment priority numbers is included in Table B-2.

5. The stream priority list is used as the base for the later determination of the project priority ratings.

C. Municipal List by Priority Rank

1. In conjunction with the ranking of the stream segments of the state of Louisiana in priority order to facilitate the direction of management emphasis, each municipality that has requested consideration for funding is

rated as to its propensity to pollute. This rating of municipalities forms an important water quality management tool.

2. The priority rating for each municipality considered is composed of two factors, the stream segment priority rating and the municipality factor. These two numbers are added together to form the basic project priority rating.

3. The municipality factor is based on the condition and age of any existing facilities within the project area, and the capability of existing facilities to achieve enforceable requirements of the Clean Water Act. Appropriate values from each of the category classifications are added together to produce the municipality factor.

4. A separate municipality factor shall be determined for each treatment facility and the collection system within its service area. When two or more treatment facilities will be included in a single project, regardless of whether they are in the same or different municipalities, the municipality factor for the project will be the weighted average, weighted on population served, of the municipality factors for all treatment facilities included in the project.

5. The priority rating for a municipality may be re-evaluated and adjusted whenever new information is made available. Such information may result from facilities planning, water quality analysis, etc.

6. Any municipality that believes that its priority rating was calculated erroneously, or that the situation used as the basis for calculating its priority rating has undergone a significant change not avoidable or correctable by the municipality, may request that its priority rating be recalculated. Any such requests should include the reasons that the municipality believes the priority rating to be in error.

Those projects with an existing treatment facility in need of upgrade or expansion will be awarded points from the following table based on the age and type of treatment.

Age of treatment plant	0 to 5 years	6 to 10 years	11 to 15 years	16 to 20 years	Over 20 years
Mechanical plant	2	4	6	8	10
Aerated lagoon	1	2	4	5	7
Stabilization pond	0	1	2	3	4
Other	0	0	1	1	2

Those projects with an existing collection system in need of rehabilitation or I/I correction will be awarded points

from the following table based on the age of the collection system.

Age of collection system	Points
0 - 10 years	2
11 - 20 years	4
21 - 30 years	6
31 - 40 years	8
Over 40 years	10

POLLUTION REDUCTION FACTOR

FUTURE LEVEL OF TREATMENT PRESENT TREATMENT LEVEL	SECONDARY	ADVANCED (BOD<20)	ADVANCED (20>BOD<10)	ADVANCED (BOD<10)
Raw	80	90	90	100
Less than Secondary	60	70	80	90
Secondary	20*	60	70	80
Advanced (BOD<20)	NA	20*	60	70
Advanced (20>BOD<10)	NA	NA	20*	60
Advanced (BOD<10)	NA	NA	NA	20*
Unsewered	30	40	50	60
N/A - Rehabilitation and/or I/I correction only				40
N/A- No reduction in pollution discharge anticipated				20

* If no change to treatment but increase capacity, change 20 to 40

Formula:

Category Factor + Pollution Reduction = Municipality Factor

Basic Project Priority Rating = Stream Segment Priority Rating + Municipality Factor

D. Municipal Facilities Priority List

1. Upon receipt of a request by the authorized representative of a municipality, the basic priority rating will be determined and the proposed project will be placed on the Municipal Facilities Priority List.

2. Request for inclusion on the Municipal Facilities Priority List must include the following:

- a. a resolution from the governing authority designating a project representative and authorizing him/her to submit preapplication materials;
- b. a completed Form RF-100;
- c. a map of the proposed planning area.

3. It is the responsibility of each authorized project representative to maintain current and accurate information for his/her project, and to submit any revised or updated project information to the Department each year for use in preparing the Municipal Facilities Priority List. Only project information received by April 1 will be considered for inclusion on the next fiscal year's priority list.

4. The loan amount shown on the list will be the estimated amount of those items of work that are eligible for loan assistance. Eligibility of specific items of work will be based on the latest federal requirements in effect at the time the list is prepared. Should these requirements be changed subsequent to preparation of the list, all projects on the list will be adjusted as required. The monetary amount of each item will be based on the latest information

supplied by the authorized project representative in accordance with Paragraph 2 of this Section.

5. Projects normally proceed in three steps: Facility Planning, Design, and Construction.

It is intended that projects that have completed Facility Planning and Design and are ready to begin construction will be considered for funding before projects that are not ready to begin construction. Projects will be awarded points in addition to the basic priority rating based on the readiness to proceed to construction in accordance with the following table:

Milestone	Points
Project has completed Facility Planning and planning documents have been approved	1000
Project has completed design and plans and specifications have been approved	2000

6. Large projects may be offered assistance in several segments based on a request by the authorized project representative, on a comparison of project cost and funds available, or on other factors that may require delayed funding for portions of a project. Each segment of a project will be listed separately on the Municipal Facilities Priority List. All segments will have the same basic priority rating but each segment will have its own points awarded based on readiness to proceed.

7. The Municipal Facilities Priority List will include all projects that have requested funding assistance, ranked in priority order, regardless of the amount of funds available. The priority list will be used for the later preparation of the State Revolving Fund Intended Use Plan.

8. The Municipal Facilities Priority List will be made available for inspection each year at the same time as the Municipal Facilities Revolving Loan Fund Intended Use Plan, but not less than 30 days prior to submission to the U.S. Environmental Protection Agency. Each municipality that has submitted preapplication materials will be notified by letter of the availability of the Municipal Facilities Priority List. It is the responsibility of each potential borrower to examine all the information listed for his/her project for accuracy. Any errors or omissions should be reported to the department prior to the deadline for comments.

9. Any project or project segment will be removed from the Municipal Facilities Priority List once funding

for the project or project segment has been provided through the Municipal Facilities Revolving Loan Fund; or when the project or project segment has been constructed using another source of funds.

10. Any project that has had no verbal or written communication with the Municipal Facilities Division staff for a period of five years and has presented no other evidence of progress toward completion of items that are prerequisites to funding during the five year period shall be deemed to be a dormant project and may be removed from the Municipal Facilities Priority List. Prior to removal of a dormant project from the Municipal Facilities Priority List the Municipal Facilities Division staff will contact the project representative in writing to advise them of the impending removal of the project and to request a meeting with them to discuss progress on the project if they wish to avoid removal of the project from the Municipal Facilities Priority List.

E. Intended Use Plan

1. An Intended Use Plan is prepared for each fiscal year and details the intended uses of amounts expected to be available to the State Revolving Fund during the year. These intended uses will include loans for projects as well as other allowable uses of the Fund, including but not limited to repayment of bonds issued by the Fund, loan guarantees or insurance for local obligations, and payment of allowable costs of administering the Fund.

2. On _____ of each year the Administrator of the Municipal Facilities Division will determine the amount expected to be available for loans for projects for the next fiscal year. This amount will *not* include the net proceeds of any bonds expected to be issued during the year. If issuance of bonds is proposed, the selection of projects to be funded with bond proceeds will be made in accordance with the provisions of Section F.

3. Of the amount expected to be available in accordance with Paragraph 2 of this Section, certain amounts will be reserved in accordance with Section G.

4. Projects must be included on the current Municipal Facilities Priority List that has met public participation requirements and been accepted by the Environmental Protection Agency in order to be selected for the Intended Use Plan. Projects on the proposed Municipal Facilities Priority List may be selected for the proposed Intended Use Plan provided that both the proposed Priority List and Intended Use Plan meet public participation requirements and are accepted by the Environmental Protection Agency.

5. Projects on the Municipal Facilities Priority List will be selected to receive funds from the amount expected to be available in accordance with Paragraph 2 of this Section, less any reserves established in accordance with Section G, by considering projects in several categories for funding. All projects in a high priority category will be

funded before any projects in a lower priority category are funded. Within each category projects will be considered for funding in order of the priority ranking of the individual project. The several categories that are considered are as follows:

a. Projects that qualify for hardship grant assistance, provided that hardship grant funds are available and that additional funds in the form of a loan from the Municipal Facilities Revolving Loan Fund program will be needed to supplement the hardship grant funds.

b. Projects which are required for completion of an ongoing project for which at least one segment has already received funding through the Municipal Facilities Revolving Loan Fund program, and that will not result in an operable treatment system without the additional funds. To qualify as an ongoing project, the work for which additional funds are required must be specifically identified within the scope of work for the project for which a Facilities Plan has been approved by the Department.

c. All other projects that do not meet either of the above conditions.

6. Notwithstanding the provisions of paragraph 5 above, no project on the Drinking Water Revolving Loan Fund Priority List will be placed on the Intended Use Plan unless the municipality has submitted a Letter of Intent to the Department stating the Municipality's intention to proceed with the project, and a project schedule that indicates that the Municipality will have completed all prerequisite program requirements and will be able to receive a loan during the fiscal year.

7. The State of Louisiana Municipal Facilities Revolving Loan Fund Intended Use Plan is divided into two portions: a. the fundable portion and b. the planning portion. The fundable portion includes those projects expected to be awarded assistance during the fiscal year of the list. The planning portion includes those project steps expected to receive funding during the next four fiscal years after the fiscal year of the list, based on the best available information on funds expected to be available.

8. The State of Louisiana Municipal Facilities Revolving Loan Fund Intended Use Plan will be made available for inspection at the same time as the Municipal Facilities Priority List each year, but not less than 30 days prior to submission to the U.S. Environmental Protection Agency. Each municipality that has submitted preapplication materials will be notified by letter of the availability of the Intended Use Plan. It is the responsibility of each potential borrower to examine all the information listed for his/her project for accuracy. Any errors or omissions should be reported to the department prior to the deadline for comments. Applications for assistance which deviate substantially from the proposed project amount contained in the Intended Use Plan might

not be processed.

9. A project may be moved from the fundable portion of the list to the planning portion (bypassed) if it is determined that the project will not be ready to proceed during the funding year.

10. If cash flow of the program permits, either through project bypasses or the availability of additional federal capitalization funds, or if for any other reason it is determined by the department that additional funds are available for projects, projects from the planning portion of the list which are ready for funding and which have completed the priority list public participation requirements will be advanced to the fundable portion of the list. Individual projects will be advanced, in accordance with provisions of Paragraph 5 of this Section until the available federal funding is consumed.

11. If insufficient projects meeting the criteria of Paragraph 6 of Section D for advancement from the planning to the fundable portion of the list are available to consume the additional funds, the department may prepare a revised list containing projects which have not met public hearing requirements.

12. If the actual amount available during the year is less than the projected amount expected to be available in accordance with Paragraph 2 above, and it is not possible to fund all projects on the fundable portion of the Intended Use Plan, then, of the projects not yet funded, those projects selected last for inclusion on the Intended Use Plan will be moved from the fundable portion to the planning portion until the remaining projects can be funded with the available funds.

13. If any project requests more funds than the amount listed on the Intended Use Plan for that project, and granting the additional funds would result in insufficient funds for the remaining projects on the fundable portion, the additional funds will not be granted; but the project may request the additional funds be added to the fundable portion for the next fiscal year.

14. The State of Louisiana Municipal Facilities Revolving Loan Fund Intended Use Plan will be submitted to the U.S. Environmental Protection Agency for their review and acceptance as soon as possible after the public comment period has expired.

F. Bond Sales (Leveraging)

1. When there is insufficient monies in the fund to meet the needs for assistance in a timely manner, and it is determined to be in the best interest of the fund, the Department may sell bonds to increase the amount of money available for loans.

2. The Department must pledge some assets of the fund as security for the bonds and as a source of revenue to retire the bonds. Assets that may be pledged include loans to be made with the proceeds of the bonds, existing loans, or other assets as agreed upon by the Department and the bond purchasers.

3. A sale of bonds may be proposed where loans will be made with the proceeds of the bonds, and the repayment of those loans will be used to retire the bonds.

a. Those municipalities intended to receive loans from bond proceeds will be expected to make timely repayments on their loans, and therefore must meet certain creditworthiness criteria as required by conditions of the bonds.

b. Any municipality that does not meet the required creditworthiness criteria for a particular bond sale may not benefit from the proceeds of the bonds.

c. Those municipalities intended to receive loans from bond proceeds must be ready to begin construction within the time specified in the bonds.

d. Projects to receive loans from the proceeds of the bonds will be selected in accordance with the provisions of this priority system, except that projects that do not meet the required creditworthiness criteria will not be selected.

4. A sale of bonds may be proposed where the repayments of existing loans will be used to retire the bonds.

a. The proceeds of these bonds will not be dedicated to any specific projects and will be deposited into the fund.

b. Projects to receive loans from the proceeds of the bonds will be selected in accordance with the provisions of this priority system, with no extraordinary creditworthiness criteria.

G. Reserves Related to the Intended Use Plan

1. Reserves for State Management Assistance

a. The state may set aside a portion of the total funds available during the Intended Use Plan year for use by the Department in fulfilling its obligations to manage the Municipal Facilities Revolving Loan Fund Program.

b. This reserve is currently limited to four percent of each federal capitalization grant.

2. Reserve for loans to supplement Hardship Grants

a. The state may set aside a portion of the total funds available during the Intended Use Plan year for loans to municipalities that are expected to receive hardship grants, and that will require additional funding to

complete the project for which hardship grant funding is proposed. b. To avoid loss of funds, projects that qualify for hardship grants will be placed on the fundable portion of the Intended Use Plan, ahead of other projects in accordance with provisions of Paragraph 5 of Section E. This reserve will be implemented only to the extent necessary to avoid loss of hardship grant funds.

3. Reserve for loans for Facilities Planning and Design.

a. The state may set aside a portion of the total funds available during the Intended Use Plan year for loans to municipalities for Facilities Planning and Design.

b. This reserve is limited to municipalities that meet all of the following conditions:

i. The construction portion of the project must appear within the five year planning portion of the Intended Use Plan.

ii. The loan is to perform facility planning or design work that has not been previously funded.

iii. The applicant does not have the financial capability to complete facility planning and design work without financial assistance.

c. This reserve will be implemented only to the extent that the state deems necessary to provide assistance to municipalities that would be unable to complete Facilities Planning and Design work without assistance and that are expected to receive assistance for construction when Facility Planning and Design work are completed. This reserve may not exceed ten percent of the funds available in accordance with Paragraph 2 of Section E.

4. Reserves required for sale of bonds

a. The state may set aside a portion of the total funds available during the Intended Use Plan year to use as security, to establish debt service reserve funds, or for other purposes that may be required for the sale of bonds for the purpose of increasing the funds available to the Municipal Facilities Revolving Loan Fund.

b. This reserve will be implemented only when the Department determines that sale of bonds is in the best interests of the Municipal Facilities Revolving Loan Fund program and only to the extent that such securities and/or reserve funds are required.

H - Hardship Grants

1. Funds may be appropriated by Congress and allocated to the states for the purpose of making hardship grants to communities for the construction of wastewater collection and treatment facilities. When such funds are available

to the state, they will be used to make grants to municipalities that meet all of the following conditions at the time an application for grant assistance is submitted:

a. The recipient community must have a population of 3,000 persons or less, may not be a remote area within a larger city, and must be designated by the state as a rural community.

b. The recipient community does not have centralized wastewater treatment or collection facilities, or needs improvements to onsite wastewater treatment systems and the state must determine that assistance will improve public health or reduce an environmental risk.

c. The per capita annual income of residents served by the project does not exceed 80 percent of the national per capita annual income according to the most recent determinations by the Bureau of the Census. (Currently \$13, 244 is 80 percent of the national per capita annual income of \$16,555, based on 1994 information.)

d. The local unemployment rate in the recipient community must exceed by one percentage point or more the most recently reported, monthly, national unemployment rate.

e. Without hardship assistance, the average annual wastewater treatment cost per household would exceed affordability criteria used by the state in making loans to municipalities.

2. The amount of hardship grant assistance to any community may not exceed the amount necessary to make a loan through the Municipal Facilities Revolving Loan Fund affordable.

3. If a community receives a hardship grant for a portion of the project cost and a loan from the Municipal Facilities Revolving Loan Fund for the remainder of the project cost, then the project must meet all of the requirements of Municipal Facilities Revolving Loan Fund projects.

4. If the Department receives applications for hardship grant assistance that exceed the funds available, the priority rating determined in Section C will be used to determine which applicant or applicants will receive hardship grant assistance. .

VERMILION-TECHE RIVER BASIN				
060101	Spring Creek - Headwaters to Cocodrie Lake (Scenic)	2	10	20
060102	Cocodrie Lake	2	5	10
060201	Bayou Cocodrie - From U.S. Hwy. 167 to the Bayou Boeuf-Cocodrie Diversion Canal (Scenic)	5	10	50
060202	Bayou Cocodrie - From Cocodrie Diversion Canal to intersection with Bayou Boeuf	5	5	25
060203	Chicot Lake	2	5	10
060204	Bayou Courtableau - Origin to West Atchafalaya Borrow Pit Canal	5	5	25
060205	Bayou Teche - Headwaters at Bayou Courtableau to Interstate Hwy. 10	5	5	25
060206	Indian Creek and Indian Creek Reservoir	2	15	30
060207	Bayou des Glaises Division Channel/West Atchafalaya Borrow Pit Canal (St. Landry, Avoyelles, and St. Martin Parishes)	2	5	10
060208	Bayou Boeuf - Headwaters to Bayou Courtableau	5	5	25
060209	Irish Ditch/Big Bayou - Unnamed Ditch to Irish Ditch (Ditch No. 1) to Big Bayou to Irish Ditch No. 2 to Confluence with Bayou Rapides	5	5	25
060210	Bayou Carron	4	5	20
060211	West Atchafalaya Borrow Pit Canal - from Bayou Courtableau to Henderson, La, includes Bayou Portage	2	5	10
060212	Chatlin Lake Canal and Bayou Dulac - from Alexandria, La, to Bayou des Glaises Diversion Canal (includes 0602 segment of Bayou des Glaises)	2	5	10
060301	Bayou Teche - Interstate Hwy. 10 to Keystone Locks and Dam	5	5	25
060401	Bayou Teche - Keystone Locks and Dam to Charenton Canal	5	5	25
060501	Bayou Teche - Charenton Canal to Wax	5	15	75

TABLE B-2				
Subsegment Number	Stream Description	Degree of Support	Designated Uses	Priority Number
	Lake Outlet			
060601	Charenton Canal - From Charenton Floodgate to Intracoastal Waterway, includes Bayou Teche from Charenton to Baldwin	2	5	10
060701	Tete Bayou	4	5	20
060702	Lake Fausse Point and Dauterive Lake	2	5	10
060703	Bayou du Portage	5	5	25
060801	Vermilion River - Headwaters at Bayou Fusiliers-Bourbeaux junction to New Flanders (Ambassador Caffery) Bridge, LA Hwy. 3073	5	5	25
060802	Vermilion River - from New Flanders (Ambassador Caffery) Bridge, LA Hwy. 3073 to Intracoastal Waterway	5	5	25
060803	Vermilion River Cutoff - From Intracoastal Waterway to Vermilion Bay (Estuarine)	4	5	20
060804	Intracoastal Waterway - Vermilion Lock to Levee at Segment 0611 and 0608 boundary (Estuarine)	4	5	20
060805	Breaux Bridge Swamp (Cypriere Perdue Swamp) , 0.5 mile Southeast of Breaux Bridge, LA, (See LAC 33:IX.1123 for full description of site and criteria)	4	5	20
060901	Bayou Petite Anse - Headwaters to Bayou Carlin (Estuarine)	2	5	10
060902	Bayou Carlin (Delcambre Canal) - Lake Peigneur to Bayou Petite Anse (Estuarine)	4	5	20
060903	Bayou Tigre - Headwaters to Bayou Petite Anse (Estuarine)	4	5	20
060904	New Iberia Southern Drainage Canal - origin to Intracoastal Waterway (Estuarine)	5	5	25
060905	New Iberia Southern Drainage Canal - Intracoastal Waterway to Weeks Bay (Estuarine)	4	5	20
060906	Intracoastal Waterway - New Iberia Southern Drainage Canal to Bayou Sale (Estuarine)	2	5	10

MISSISSIPPI RIVER BASIN				
070101	Mississippi River - From Arkansas State Line to Old River Control Structure	2	5	10
070102	Gassoway Lake	2	5	10
070103	Marengo Bend (Old River Near Vidalia)	2	5	10
070201	Mississippi River: From Old River Control Structure to Monte Sano Bayou	4	15	60
070202	Old River Lake or Raccourci Lake	2	5	10
070203	Devil's Swamp Lake and Bayou Baton Rouge	5	5	25
070301	Mississippi River - From Monte Sano Bayou to Head of Passes	4	15	60
070401	Mississippi River Passes - Head of Passes to Mouth of Passes (Estuarine) (Includes Southwest, South, North Passes and Pass a Loutre)	2	20	40
070402	Baptiste Collette Bayou (Estuarine)	2	20	40
070403	Octave Pass and Main Pass (Estuarine)	2	20	40
070404	Tiger Pass, Red Pass, Grand Pass Tante Phine (Estuarine)	2	20	40
070501	Bayou Sara - Mississippi State Line to Mississippi River confluence	2	5	10
070502	Thompson Creek - Mississippi State Line to Mississippi River confluence	4	5	20
070503	Capitol Lake	5	5	25
070504	Monte Sano Bayou - from US Hwy 61 to Mississippi River confluence	4	5	20
070505	Tunica Bayou - Headwaters to Mississippi River	2	5	10
070601	Mississippi River Basin Coastal Bays and Gulf Waters to State three-mile limit	2	20	40

TABLE B-2				
Subsegment Number	Stream Description	Degree of Support	Designated Uses	Priority Number
OUACHITA RIVER BASIN				
080101	Ouachita River - Arkansas State Line to Columbia Lock and Dam (Scenic from the Arkansas State Line to intersection with Bayou Bartholomew -22 miles)	4	15	60
080102	Bayou Chauvin - Headwaters to the Ouachita River	4	5	20
080201	Ouachita River - Columbia Lock and Dam to Jonesville	4	5	20
080202	Bayou Louis - Headwaters to Ouachita River	4	5	20
080203	Lake Louis	4	5	20
080301	Black River - Jonesville to Corps of Engineers Control Structure (at Mile 25, Serena)	2	5	10
080302	Black River - Corps of Engineers Control Structure to Red River	2	5	10
080401	Bayou Bartholomew - Arkansas State Line to Dead Bayou (Lake Bartholomew) (Scenic)	4	10	40
080402	Bayou Bartholomew - Dead Bayou (Lake Bartholomew) to Ouachita River	2	5	10
080501	Bayou de L'Outre - Arkansas State Line to Ouachita River (Scenic)	2	10	20
080601	Bayou D'Arbonne - Headwaters to Lake Claiborne	2	15	30
080602	Lake Claiborne	2	15	30
080603	Bayou D'Arbonne - From Lake Claiborne to D'Arbonne Lake	2	5	10
080604	Bayou D'Arbonne Lake	2	5	10
080605	Bayou D'Arbonne - From D'Arbonne Lake to Ouachita River (Scenic)	2	10	20
080606	Cypress Creek - Headwaters to Bayou D'Arbonne (includes Colvin Creek)	2	5	10
080607	Corney Bayou - From Arkansas State Line to Corney Lake (Scenic)	2	10	20

TABLE B-2				
Subsegment Number	Stream Description	Degree of Support	Designated Uses	Priority Number
080608	Corney Lake	2	5	10
080609	Corney Bayou - From Corney Lake to Bayou D'Arbonne Lake (Scenic)	4	10	40
080610	Middle Fork of Bayou D'Arbonne - From origin to Bayou D'Arbonne Lake (Scenic)	2	10	20
080701	Bayou Desiard (Oxbow Lake) and Lake Bartholomew (Dead Bayou)	2	15	30
080801	Cheniere Creek	2	5	10
080802	Cheniere Brake Lake	2	5	10
080901	Boeuf River - Arkansas State Line to Ouachita River	2	5	10
080902	Bayou Bonne Idee - Headwaters to Boeuf River	2	5	10
080903	Big Creek - Headwaters to Boeuf River (including Big Colewa Bayou)	2	5	10
080904	Bayou Lafourche - Near Oakridge to Boeuf River near Columbia	4	5	20
080905	Turkey Creek - Headwaters to Turkey Creek Cutoff and Turkey Creek Cutoff to Big Creek including Glade Slough	4	5	20
080906	Turkey Creek - From Turkey Creek Cutoff to Turkey Creek Lake	2	5	10
080908	Lake LaFourche	2	5	10
080909	Crew Lake	2	5	10
080910	Clear Lake	2	5	10
080911	Woolen Lake	2	5	10
081001	Bayou Macon - Arkansas State Line to Tensas River	2	5	10
081002	Joe's Bayou - Headwaters to Bayou Macon	2	5	10
081101	Lake Providence (Oxbow Lake)	2	5	10
081201	Tensas River - Headwaters to Jonesville (including Tensas Bayou)	2	5	10
081202	Lake St. Joseph (Oxbow Lake)	2	5	10
081203	Lake Bruin (Oxbow Lake)	2	15	30
